

**New Jersey Invasive Species Strike Team  
Weather Protocol for Herbicide Application - 2012**

Herbicide Type	Recommended Application Method	Maximum Temperature (Farenheit)	Minumum Dry Time Required (hours)
Garlon 4	Basal Bark	85	2
Garlon 4	Cut Stump	85	2
Accord XRT	Cut Stump	90	2
Accord XRT	Foliar Spray	90	4
Garlon 3A	Foliar Spray	85	4
Rodeo	Cut Stump	90	2
Rodeo	Foliar Spray	90	4

**Snow/Ice:** Application may *not* occur while snow/ice is on the ground

**Low humidity:** Adjust nozzle to increase droplet size

**Rain:** All applications of herbicides should occur on dry or reasonably dry foliage or bark

**Wind:** Adjust nozzle to increase droplet size and aim sprayer low in *light wind* . *In high winds, do not apply.*

**Cut stump applications:** Apply in summer or fall after sap is done rising.
